

STEN MAYUNGA

DEVELOPER

SUMMARY

I am a highly analytical and motivated individual, with extensive experience in developing dynamic websites and software. My strength are in problem solving, communication and working on my own initiative as a self taught developer. I am passionate of my new career in development and dedicated to continuous learning. I have completed numerous paid and unpaid real-world projects to showcase my competent use of front and back-end technologies, most of which can be found on my developer website:

<https://www.stentechdev.com>.

I am a confident speaker with over a decade of public speaking experience and work very well in a team.

WORK EXPERIENCE

Web Developer, Freelance — 2014-Present

I have been designing and creating website as a hobby and freelance web developer on and off since 2014. I've used platform such as Wix, Shopify and Wordpress and have become familiar with Liquid and PHP as a result. My preferred programming language is JavaScript which I am currently mastering. I am constantly learning and willing to adapt my technologies to best suit the projects I work on.

Full Stack Developer, London App Brewery — 2021-2022

During my time studying and working on project at the London App Brewery bootcamp, I learn an extensive list of technologies and tools which included: JS ES6, JQuery, Node.js, APIs, SQL, React.js just to name a few as well as Backend and Front-End Web Development. At the end of the bootcamp, I completed over 25 websites, some of which can be found on my developer website.

Technical Support Specialist, Bose Corporation — 2020-2021

I worked with the US customer base by providing them with product troubleshooting and guiding customers to solve any problem that may have arisen with their Bose products or accounts. I built a knowledge of all the products suite available and the software used to run the products. Problem solving and persistence was key in this role which had a direct correlation to customer satisfaction.
